To whom it may concern,

Stableload has proved to be very professional and helpful with the installation of our new dock levelers.

We did not have any problems what so ever with the staff of Stableload on our premises. The job was executed in time as quoted by them to us.

We have no qualms in recommending Stableload to any prospective company.

The operational aspects of these docklevelers are a vast improvement to the previous hydraulic docklevelers, the operation is also much simpler. I would not advise prospective buyers to use or install hydraulic levelers, as opposed to the electrical that is technically much more advanced.

Yours sincerely

  
JOHAN DE LANGE
