DEAR SIR

SUBJECT : KELLY DOCK LEVELER

As you know I have been in the material handling environment for over 25 years. I was involved in the very first Dock Levelers to be installed in South Africa.

Over the year's I have seen an improvement in the quality of Dock Leveler. My company has been involved with all aspect's of material handling and have had the opportunity to study all make's of equipment at first hand. When we built our own premises in 1996 we installed the Kelly FX Dock Leveler.

I have used the Kelly Dock Leveler for the past 3 year's without any problems whatsoever. It is simple to use and is extremely safe.

I have no reservation in endorsing this product.

Yours faithfully

Dave Gardner
